I am a Front-End Developer specialized in React.js, with more than 4 years of experience.

My journey began in 2018, and since then, I've been diving deep into creating robust, high-quality systems. I have solid JavaScript and TypeScript skills, and am committed to developing attractive, prototype-like interfaces. My passion for Front-End, combined with my technical expertise, enables me to transform innovative ideas into attractive visual interfaces.

In addition to technical skills, I bring a mentality focused on results, constantly seeking to improve the user experience. I'm excited to contribute to challenging projects and continue growing in the dynamic world of web development.

Main Technologies

- JavaScript
- TypeScript
- React.js
- Next.js

Complementary Technologies

During development I use certain libraries for most systems, some of them are:

- redux (redux-toolkit)
- jotai
- react-query
- axios
- Material-UI
- Mantine UI
- styled-components
- Tailwind CSS
- Jest
- StoryBook

Skills

- Create readable code for other developers.
- Create tests to ensure system reliability.
- Document system components.
- Find bugs and propose action plans for correction.
- Team work.
- Creative thinking.
- Follow instructions and deliver quality results.
- Lead junior developers.
- Willingness to continuous learning.

Experience

JUNE 2022 - NOVEMBER 2022

Front-End Developer / July Otch. Beauty Salon.

Responsible for creating and maintaining the company's website. Dealing with all optimization issues in general, SEO and accessibility mainly.

JANUARY 2022 – CURRENTLY

Full-Stack Developer / Self-employed Freelancer

Responsible for developing plans, goals and schedules in order to complete projects on time. Support in conflict resolution, seeking to negotiate beneficial agreements for both parties. During my journey as a Freelancer I have come across several challenges, from poorly managed teams to legacy codes and all of this has made me a more mature professional.

Academic Education

JANUARY 2018 - APRIL 2022

Management Informatics / Polytechnic Institute of Administration and Management of Catumbela

During my high school journey I was considered the best in the school in programming, in the 1st year I was already studying HTML and CSS, a subject that would be taught in the 3rd year. In the 2nd year I was already using JavaScript, PHP and MySQL and building the front-end and back-end of simple systems. In the 3rd year, when HTML and CSS classes started, I started my studies in React and Laravel and was already creating more complex applications with a certain quality and ease. High school.

Additional Activities

- I created the prototype of a system from scratch using AdobeXD, I am not an expert in UI/UX, however going through this experience made me a professional with a greater commitment to creating the components designed by the UI designer with high fidelity, paying attention to the minimum Details.
- I developed numerous study projects from the idealization phase, prototyping, database modeling, coding to the implementation of the project on the internet.
- I've been helping junior developers with code reviews, bug fixing, tips to improve the code, and even help them take the next steps.

Languages

- Native Portuguese
- Intermediary English

Hobbies

- Programming and studying technologies and interesting concepts from the world of technology is without a doubt my biggest hobby.
- Watch movies, series and anime. I love science fiction and romance.
- Listen to music.
- Read romance, science fiction or some social book.
